La resistencia que la naturaleza ha logrado desarrollar durante milenios, gracias a la tecnología, se consigue en cuestión de horas. Los materiales porcelánicos alcanzan una durabilidad comparable a la de la roca, gracias a la selección precisa de materias primas, el proceso de prensado y los ciclos térmicos a los que se somete. Como resultado final, un diseño refinado que adapta los patrones naturales a miles de gráficos, integrándolos perfectamente en nuestras colecciones de porcelánico.

EN

The resistance that nature has developed over millennia is achieved in just a few hours through technology. Porcelain materials offer the same durability as rock, thanks to the precise selection of raw materials, the pressing process, and the thermal cycles they undergo. The final result is an exquisite design that adapts natural patterns into thousands of graphics, seamlessly integrated into our porcelain collections.

El avance tecnológico y la investigación de nuestro departamento de I+D+i han permitido desarrollar una gama de porcelánicos con espesor reducido a 6.7-6.8 mm, manteniendo sus propiedades esenciales como resistencia, diseño y durabilidad. Esto ha logrado un ahorro del 30% en materias primas y energía, reduciendo las emisiones de CO2. El material es más flexible, facilitando su manejo y colocación, y su menor peso optimiza los costos de transporte. La tecnología de prensado avanzada y las materias primas optimizadas mejoran su resistencia, resultando en un material más compacto, ligero y duradero.

ES

Eco Red comprende los productos de pasta roja, elaborados a partir de arcillas rojizas que caracterizan esta tipología de material cerámico. Este tipo de cerámica es especialmente versátil, utilizándose comúnmente para revestimientos de pared, aunque su versión para pavimento no debe pasarse por alto. Gracias a su composición, Eco Red ofrece una estética cálida y natural, además de una excelente resistencia, lo que lo convierte en una opción ideal tanto para aplicaciones verticales como horizontales.

EN

Eco Red includes red-body products, made from reddish clays that define this type of ceramic material. This ceramic is especially versatile, commonly used for wall coverings, though its version for flooring should not be overlooked. Thanks to its composition, Eco Red offers a warm, natural aesthetic, along with excellent durability, making it an ideal choice for both vertical and horizontal applications.

Una FDE es una Declaración Ambiental y de Salud de Producto. Las FDE, son francesas, por lo que se trata de una declaración ambiental específica para dicho país. Pero, estas normas francesas son mucho más exhaustivas y concretas, y contienen mucha más información que las DAPs.

An FDE is an Environmental and Health Product Declaration. These standards are French and so this is a specific environmental declaration for France. These French standards are far more exhaustive and specific and they contain far more information than an EPD.

El CE es una certificación autodeclarada. Está regulado por el Organismo Europeo de productos de construcción y es obligatoria para todos los productos de construcción que se comercializan en Europa, se establecen las propiedades o prestaciones mínimas que debe de tener el producto. El UKCA es igual que el CE pero para el Reino Unido.

CE is a self-certification procedure. The system, which is regulated by the EU Construction Products Regulation, is compulsory for all building products placed on the Spanish market. UKCA is exactly the same as the CE system.
